

STRIP-60-RGB-WP

Flexible LED Strip

Description

Introducing STRIP-60-RGB-WP LED strip lighting system. STRIP-RGB-60-WP weatherproof offers new possibilities for colour changing in damp or wet locations. The secret lies in double the amount of LEDs over one meter. Couple this with its thin and flexible PCB, encapsulated in a special silicon U-channel with silicon overlay. Applications such as outdoor areas, hand rails, pool areas are accentuated by the colourful effects achieved by this LED strip. The use for this is only limited by your imagination for a fully visual feast.

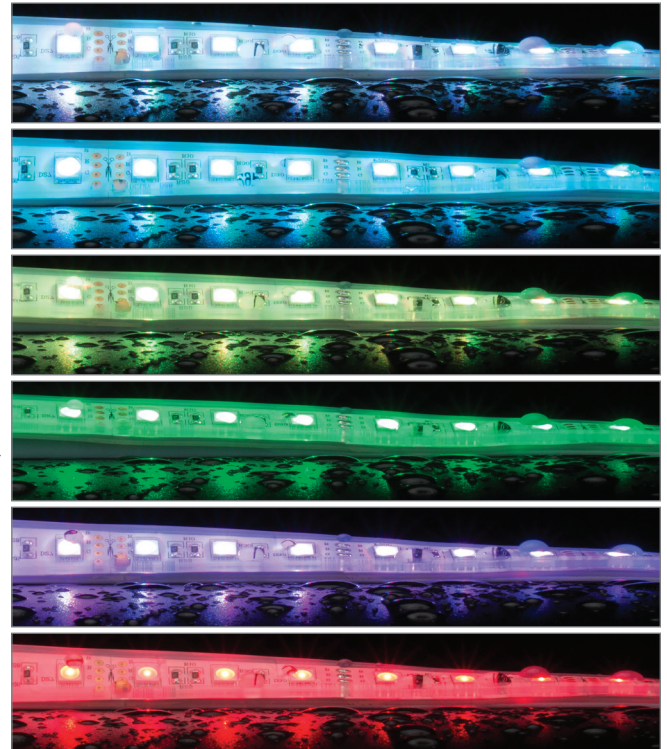

Specification Features

Colours:	RGB colour changing
Light Source:	5060 SMD LED
LED Type:	Chimei (Taiwan)
Colour Temperature (K):	Up to 16 million colours*
Number of LED per mtr:	60
Wattage Per MTR (W):	14.4W
Input Voltage (VDC):	12VDC
Beam angle (o):	120o
Wiring:	Parallel
IP Rating:	IP66**
Cutting Increments/Sections:	50mm (groups of 3 LED)
Requires:	RGB colour controller + 12VDC constant voltage driver ***
Expansion:	Signal data repeaters****
IES files:	Yes*****
Mounting:	Optional aluminium mounting profile*****

* Controller dependent.
 ** Not suitable for underwater applications
 *** For RGB controller options please refer to the controller section for further details.
 **** Required for systems over 5mtrs (20114) located in controller section.
 ***** Available upon request.
 ***** Mounting Profile Optional (not included)

Order Info

Colour:	RGB
Order Code:	20061
Product Code:	STRIP-60-WP-RGB
Lumens/m:	440 lm/m
