

VISION-9 Spotlight

Description

The surface mounted VISION-9 Spot Light provides the perfect solution for illuminating your outdoor areas; including pathways, yards and around and amongst your garden just to name a few. This Spot Light provides 9W of high intensity light at a 35° beam angle in either White or Warm White LED, featuring Edison Chip On Board (COB) technology.

The VISION-9 Spot Light is constructed from cast-aluminium and is put through a special chromate process, before a polyester powder coat is applied, to complete the finish. This in combination with its IP54 rating provides a resilient product suited to most outdoor applications. The VISION-9 also comes backed by a Three Year Replacement Warranty for peace of mind.

Specification Features

Input Voltage: 240V AC
 Power (W): 9W
 IP rating (IP): 54
 Lumens (lm): Warm White 3000K - 800lm
 White 5000K - 850lm
 LED type: EDISON COB
 CCT: 3000K - 5000K
 CRI: ≥80
 Beam angle (°): 35°
 Dimmable: No
 Lifespan (hrs): 50,000hrs

Order Code: 19518
 Product Code: VISION-9-SLR-WW
